

Holley SNIPER EFI 2 M8 CAN BUS RULES:

CAN BUS TERMINATION OCCURS AT THE FIRST AND LAST DEVICES WITH 120-OHM RESISTORS. DEVICES BETWEEN THEM DO NOT HAVE RESISTORS, CREATING A 60-OHM RESISTANCE BETWEEN THE CAN BUS HIGH AND CAN BUS LOW LINES.

1. ECU'S HAVE TERMINATING RESISTOR (120 OHM)
2. DEVICES WITH A MALE AND FEMALE M8 CONNECTION **DO NOT HAVE A RESISTOR**
3. DEVICES/MODULES WITH A FEMALE ONLY M8 CONNECTION HAVE A TERMINATING RESISTOR (120 OHM)
4. TO USE MORE THAN ONE DEVICE WITH 120 OHM TERMINATION AT THE SAME TIME, USE THE SNIPER EFI CAN HUB, 558-494.
5. THERE SHOULD BE NO UNUSED M8 CONNECTIONS ON ALL CAN BUSES WHEN THE BUS IS BEING USED.
