

T3004 Spark Plug Wire Stripping Tool

This tool is factory set to strip most 7mm and 8mm spark plug wires. Test the cut depth and make fine adjustments prior to using on each wire size. Adjustments can be made with the Allen wrench found on the bottom of the tool.

Operation

- Hold the tool with thumb lever facing up. Depress lever and insert wire into tool jaws.

Release lever and rotate tool up and around the wire two or three times. Without opening the stripper jaws, hold the wire and pull the tool towards the cut end.
