

WARRANTY

If you have problems during installation that can't be solved by reading and following the instructions:

1. Leave the part on your vehicle
2. Take some pictures of the installation with your cell phone in case you need to send them to Powermaster while troubleshooting
3. Call Powermaster at 800-862-7223 and ask their Tech Department for help
4. Solve the problem with them on the phone
5. Email pictures, if that helps you explain what is going on, to tech@powermastermotorsports.com
Include your phone number, name and address so they can call you back during business hours if needed

If the issue cannot be resolved with Powermaster Technical Support while the product is still installed on the vehicle, the product may be eligible for return to Speedway Motors if it is within the warranty period.

Powermaster's warranty is one year from the date of purchase on all street rod components and 90 days from the date of purchase on any component used in off-road or race applications.
