91064051 - Universal Headlight Switch, 3 Position, Black Knob

This switch is a 3-position switch with the following functions:

- Off Position
- Position 1 (1st Pole): Acc./Park (Front Running Lights) / Running/Park (Rear Running Lights) ON
- Position 2 (2nd Pole): Running/Park (Rear Running Lights) / Headlights ON

It has 4 terminals:

- **Terminal (B):** Battery + (Power In)
- **Terminal (A):** Acc./Park (Front Running Lights)
- **Terminal (R):** Running/Park (Rear Running Lights)
Note: Also used for Dash Lighting if required.
- **Terminal (H):** Headlights (Provides Power to Dimmer Switch)

Operation:

- **OFF Position (Off):**

The 12V battery terminal (B) is hot, but all other terminals (A, R, H) are OFF.

- **Position 1 - (ACC/Park Lights & Running/Park Lights On):**

With 12V at the battery terminal (B), both the ACC/Park Lights terminal (A) and Running/Park Lights terminal (R) are ON (HOT), but the Headlight terminal (H) is OFF.

- **Position 2 - (Running/Park Lights/Headlights On) :**

With the switch fully pulled out, the ACC/Park Lights terminal (A) is OFF, while the Running/Park Lights terminal (R) and Headlight terminal (H) are ON (HOT).
