

Note:

The metal housing of the lamp is electrically grounded to prevent radio frequency interference. The lamp and or vehicle could be damaged if the lamp were to be wired backwards. **Do not apply voltage to the white wire.**

The lamp is not compatible with a vehicle that its headlights wired as a positive ground or a low side switch. Please contact Truck-Lite technical support (888-562-5012) with further questions.

Wire Designations:

White – Negative Ground

Red – High Beam

Green – Low Beam
